More flavour. Less smoke.

After hundreds of hours of recipe testing, our chefs have paired your favourite foods with a recommended temperature setting that will maximise grill flavours while minimising smoke.

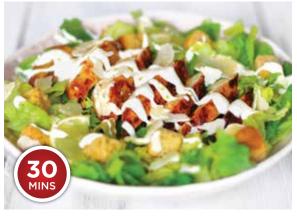

Best for bacon and sausages, and when using thicker barbecue sauces.

Always use recommended oils

For less smoke, use oils with a high smoke point, like vegetable, coconut, grapeseed or avocado oil instead of olive oil. If you choose to cook ingredients at a higher temperature with olive oil, it may result in more smoke.

Best for steaks, chicken and burgers.

Grilled Sirloin Steak & Asparagus Page 14

Best for vegetables, fruit, fresh and frozen seafood and pizza.

Perfectly done with the Digital Cooking Probe.

Never under or over cook again.

Sensor 2

Sensor 1

The leave-in Digital Cooking Probe continuously monitors temp in two places for more accurate cooking results. The Ninja® Foodi® Max Health Grill & Air Fryer lets you know when it's time to take your food off the grill and let it rest.

Dual Sensor Technology

For more information on how to use the probe refer to the instruction booklet.

How to place the probe

Once you've selected your cooking function, cooking temperature, protein type and how you would like it cooked, **insert the Digital Cooking Probe into the thickest part of your protein** while the grill is preheating.

FOOD TYPE

Steaks

Burgers Tenderloins

Fish fillets

Pork chops Lamb chops

Chicken breasts

PLACEMENT

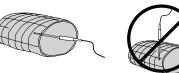

CORRECT

INCORRECT

 Insert probe horizontally into the centre of the thickest part of the meat.

- Make sure the tip of the probe is inserted straight into the centre of the meat, not angled toward the bottom or top of it.
- Make sure the probe is close to (but not touching) the bone and away from any fat or gristle.

NOTE: The thickest part of the meat may not be the centre. It is important that the end of the probe hits the thickest part so desired results are achieved.

Whole chicken • Insert

- Insert probe horizontally into the thickest part of the breast, parallel to, but not touching, the bone.
- Make sure the top reaches the centre of the thickest part of the breast and doesn't go all the way through the breast into the cavity.

DO NOT use the probe with frozen protein or for cuts of meat less than 1.5cm thick or for meat on the bone like chicken drumsticks or ribs.

Ninja[®] Beef Cooking Guide

Everyone's idea of the cooking scale differs. This guide shows you what you can expect from each of our preset beef cook settings.

Carry-over cooking

Did you know? Meat keeps cooking when you remove it from the grill.

To prevent overcooking, the unit will beep right before your food reaches the desired set cook level, taking carry-over cooking into account. Transfer meat to a plate with the probe still inserted and allow protein to carry-over cook and rest for 3-5 minutes.

Skipping carry-over cooking and cutting into food right away may result in a rarer level of cook.

Reasons meat might cook differently

No two pieces of meat are alike and, for that reason, they'll never cook the same. That's why we recommend paying close attention to the sizes of meat listed in our cooking charts. Here are some more tips to ensure a great cooking experience.

Cut size

Meats come in different shapes and sizes, which require different cooking times. If you are cooking different sizes, probe the smaller piece first as this one will cook faster than the larger piece.

For cuts 5cm or thicker (e.g., filet mignon) we recommend selecting the lower temperature setting within the level of cook you require (e.g., Rare 1 instead of Rare 2).

Meat temperature

For your convenience, cooking charts were created for use with cold meat, straight from the fridge.

For even juicier results

If time permits, let meat come to room temperature for about 30 minutes before cooking for a more juicy centre.

Flavour-Building

Tasty Marinades, Zesty Spice Rubs, and Irresistible Dipping Sauces

For the following recipes, add all ingredients to a bowl and mix well.

These marinades and spice rubs call for coarse salt ensure you use that and not fine-grain salt.

Use spice rubs liberally. Season meat or vegetables generously and allow to sit at room temperature for 30 minutes before grilling—this will promote evenness and faster cooking.

Frozen to chargrilled

When grilling frozen meats, baste them liberally and consistently with the marinade of your choosing.

To get the best textures and flavours from frozen meat, season it with your favourite spice rub before grilling.

INGREDIENTS

400g strong plain flour 1 sachet fast action/easy bake yeast 1¼ teaspoons salt 3 tablespoons extra virgin olive oil, divided 250ml-300ml tepid water Flaked sea salt, for sprinkling

TIP Add extra flavour by topping it with rosemary, sliced onion, halved cherry tomatoes and olives.

(🖄 (v)

- **2** Turn out onto a floured surface and knead for ten minutes until the dough is smooth.
- **3** Line the crisper basket with baking parchment coming about 5cm up the sides. It doesn't need to be neat and perfect. Take the dough and place it into the crisping basket, spreading it out roughly to the corners. (It will spread further and fill the basket as it proofs).
- **4** Cover the crisper basket with cling film and leave to proof at room temperature for a minimum 1 hour or until double in size.
- **5** Insert cooking pot in unit and close lid. Select BAKE, set temperature to 180°C and set time to 15 minutes. Select START/STOP to begin preheating.
- **6** Drizzle oil over the surface of the focaccia. Use both hands to dimple the dough all over the surface by digging the finger tips in. Sprinkle with sea salt flakes.
- 7 When the unit beeps to signify it has preheated, place the crisper basket into the pot and close the lid. Check the focaccia after about 12 minutes. It will sound hollow when tapped if cooked and should be nicely browned on top. When the focaccia is cooked, carefully lift the crisping basket out of the unit and remove the focaccia on the baking parchment. Transfer the focaccia onto a cooling rack, removing the parchment from under it. Serve hot or warm.
